Remote Learning Support Survey

Dear Parents/carers

The secretary of State has directed schools to provide online learning or blended learning when it is not possible for a child to attend school. We have already been providing remote or blended learning since lockdown first occurred back in March 2020. This has been provided via our website and used Purple Mash as a means to support children and parents at home. In the short term we are continuing with Purple Mash, however we will be gradually moving to Google Classroom as part of the governments directive.

<https://Remote Learning>

The purpose of this survey is to review what access your child has to digital equipment and online learning itself. The information will enable us to ensure we are providing the best possible support for your child's learning should a partial or full lockdown occur.

Thank you for your cooperation.

With kind regards

B.McGregor

Headteacher
